

CR1000Xe

Measurement and Control Datalogger

Flagship Data Logger

Accurate, Rugged, Reliable

Overview

The CR1000Xe is our flagship data logger that provides measurement and control for a wide variety of applications. Its reliability and ruggedness make it an excellent choice for remote environmental applications, including weather stations, mesonet systems, wind profiling, air quality monitoring, hydrological systems, water quality monitoring, and hydrometeorological stations. The CR1000Xe is a low-powered device that measures sensors; drives direct communications and telecommunications; analyzes data;

controls external devices; and stores data and programs in onboard, non-volatile storage. The electronics are RF-shielded by a unique, sealed, stainless-steel canister. A battery-backed clock assures accurate timekeeping. The onboard, BASIC-like programming language—common to all Campbell Scientific data loggers—supports data processing and analysis routines.

Benefits and Features

- Operational in extreme environments with a standard operating range of -40° to $+70^{\circ}\text{C}$ and an extended operating range of -55° to $+85^{\circ}\text{C}$
- Connects directly to a computer's USB port
- Captures quickly changing data values with fast analog measurement capabilities (300+ Hz)
- Differentiates even slight changes in data values with higher-resolution measurements (24 bit Adc)
- Includes microSD card drive for extended memory requirements
- Directly connects to Ethernet
- Supports full PakBus networking
- Controls CS I/O power to external modems
- Includes two non-isolated current input channels for directly connecting sensors with 0 to 20 mA or 4 to 20 mA current outputs
- Contains an onboard CPI port for hosting Campbell Scientific high-speed sensors and distributed modules (such as the GRANITE™ Series)
- Includes embedded web page for direct connection via web browser
- Provides simple serial sensor integration and measurement with SDI-12, RS-232, RS-422, and/or RS-485
- Offers a broad input voltage range of 10 to 36 Vdc
- Provides regulated 12 Vdc power output

Specifications

<ul style="list-style-type: none"> Operating Temperature Range 	-40° to +70°C (standard) -55° to +85°C (extended) Non-condensing environment	<ul style="list-style-type: none"> Analog Voltage Accuracy 	Accuracy specifications do not include sensor or measurement noise. ±(0.04% of measurement + offset) at 0° to 40°C ±(0.06% of measurement + offset) at -40° to +70°C ±(0.08% of measurement + offset) at -55° to +85°C (extended temperature range)
